

Duct Access Chamber Sections

Recycled plastic structural chambers for ducted network applications

Overview:

The EasyPIT® 100% recycled plastic duct access chamber system has been designed to be a quick-build alternative to traditional concrete or brick built access chambers. Each 150mm deep ring can be simply stacked on top of each other to the required depth to complete a totally load bearing chamber.

Designed for use in both footway and carriageway applications the EasyPIT® system has been tested up to BSEN124 F900 (90 tonne) loadings. The twin wall design incorporates internal support ribs which gives the finished chamber its inherent strength and also means that chambers do not require a concrete surround for support, for most applications.

Used by: Ministry of Defence, Local Authorities, Utility Companies, Rail Contractors, Highway Contractors, Airport Contractors

Key Advantages:

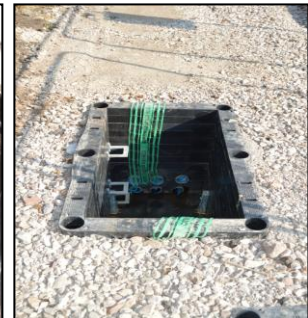

- UK manufactured from 100% recycled post industrial PVC.
- Structural design – no concrete surround required, for most applications
- Lightweight & Durable Design
- Reduced H&S risks for site personnel
- Pre-drilled duct entries available

EasyPIT® Structural Access Chambers

The twin wall design is 100mm thick providing a full bedding area for any access cover and frame and subsequent transferral of loads through the chamber.

Manufactured from highly durable polypropylene, the EasyPIT® system is lightweight and quick to install and available in a huge range of industry standard clear openings that have been independently tested by Lloyds British PLC.

The EasyPIT® chambers are used extensively throughout the UK as cable drawpits, valve chambers, Rail UTX chambers and Highway MCX chambers.

Industry Standard Clear Openings		
300x300	750x750	1200x675
450x300	900x450	1200x750
450x450	900x600	1200x900
600x450	900x750	1200x1200
600x600	900x900	1300x600
675x675	1050x1050	1300x850
750x600	1200x450	1500x750
750x675	1200x600	1500x1050

Huge range of other sizes available on request, please call

Accessories:

- Access Covers & Frames
- Cable Management Equipment
- Pre-drilled Duct Entries/Exits
- EasyRISER® Manhole Ladders
