

Duct Access Chamber Sections

Recycled plastic structural chambers for ducted network applications

Overview:

The EasyPIT CONNECT® 100% recycled plastic duct access chamber system has been designed to provide an environmentally friendly alternative to traditional brick built duct access chambers and rotationally moulded liner systems.

Predominantly used within the Traffic Signal and Street Lighting sector these chambers are suitable for any underground cable access application. Designed as both duct entry and riser section in one, there is no need to order separate items with duct entries simply being knocked-out on-site.

All EasyPIT CONNECT® chamber sections are also far less than one-man lift regulations.

Key Advantages:

- UK manufactured from 100% recycled post industrial PVC.
- Structural design – no concrete surround required, for most applications.
- 110mm duct entry knockouts
- Duct Entry & Riser section in one
- Easy push-fit stackable construction
- Reduced costs and installation times

EasyPIT CONNECT® Duct Access Chambers

Traditional rotationally moulded duct chambers are not structural and require a full concrete surround to achieve B125 loadings. The EasyPIT CONNECT® system is a totally structural and free-standing chamber that has been independently tested to BSEN124 B125 loadings by Lloyds British PLC.

Being manufactured from 100% recycled Polypropylene makes these chambers not only lightweight and extremely durable but also environmentally friendly. Furthermore, the chambers can be easily cored on-site or can be supplied from the factory complete with bespoke entries and exits to specific client requirements.

Ref	Size	Depth
EPC303015	300x300mm	150mm
EPC453015	450x300mm	150mm
EPC454515	450x450mm	150mm
EPC604515	600x450mm	150mm
EPC606015	600x600mm	150mm
EPC904515	900x450mm	150mm
EPC906015	900x600mm	150mm
EPC909015	900x900mm	150mm

Accessories:

- **Anti-Skid Composite Covers**
- **ORION Retention Sockets**
- **Carriageway Loop Boxes**
- **D400 & F900 EasyPIT Chambers**
